Ringkasan

I am an Informatics graduate from Universitas Teknokrat Indonesia with a strong interest in Web Development and Software Engineering. During my studies, I actively enhanced my technical skills through various bootcamps and online learning platforms such as Codepolitan, Dicoding, and Build With Angga, where I focused on Fullstack Web Development.

Through these programs, I learned and practiced modern web technologies including HTML, CSS, JavaScript, PHP, Laravel, Express.js and RESTful API development, as well as building responsive and scalable web applications. I also worked on several projects that helped me understand the software development lifecycle, problem-solving, and collaborative development.

I am passionate about continuously learning new technologies and improving my skills in building efficient and user-friendly web applications. As a fresh graduate, I am eager to contribute to a professional team environment, gain industry experience, and grow as a Fullstack Web Developer.

Pengalaman

RS. Airan Raya

Web Developer

April 2026 - Present (5 bulan)

Lampung Selatan

PT Microdata Indonesia

Web Developer Internship

Juli 2025 - September 2025 (3 bulan)

Sukarama, Lampung, Indonesia

During my Web Developer Internship, I worked on multiple web-based projects focusing on full-stack development, system design, and content management.

Project 1: Microdata Landing Page & Admin Dashboard System

I developed a microdata-based landing page using Next.js for the frontend and Laravel for the backend. I also built an admin dashboard that allows administrators to manage and update landing page content dynamically through a CMS-like system. This project improved content flexibility and reduced the need for manual code changes for content updates.

Project 2: Customer Management System for Internet Service Provider

I developed a customer management system for an internet service provider using Laravel. The system manages customer data, service subscriptions, and operational workflows, helping the provider streamline customer administration and improve data organization and system efficiency.

Universitas Teknokrat Indonesia

1 tahun 9 bulan

Web Development Tutor | UKM Programming Teknokrat

Desember 2023 - Agustus 2025 (1 tahun 9 bulan)

Bandar Lampung dan Sekitarnya

- Teach the fundamentals of web development, including HTML, CSS, and PHP Native.
- Guide members in understanding the Laravel framework for modern web application development.
- Provide materials and hands-on practice to enhance coding skills and problem-solving abilities.
- Support and mentor students in developing their web projects.

Center Of Excellence Software Development

Maret 2024 - Februari 2025 (1 tahun)

Bandar Lampung dan Sekitarnya

- Develop and maintain websites according to the requirements of received projects.
- Work in a team to design, implement, and test website features.
- Utilize the latest technologies in web development to ensure scalability and system security.
- Collaborate with clients or internal teams to understand business needs and translate them into effective technical solutions.

Coding Camp powered by DBS Foundation

Front-End & Back-End Developer Cohort

Februari 2025 - Juli 2025 (6 bulan)

Bandung, Jawa Barat, Indonesia

During the Coding Camp 2025 powered by DBS Foundation, I joined the Front-End & Back-End Developer learning path, an intensive semester-long technology training program designed to prepare digital talents with industry-ready skills.

I learned web programming fundamentals, including HTML, CSS, and JavaScript, followed by advanced front-end and back-end development topics such as building web applications, APIs, and server-side development using Node.js. The program also covered intermediate web development concepts and best practices for building scalable and maintainable applications.

In addition, I worked on a Capstone Project integrated with Machine Learning, collaborating with a team to develop a real-world web application that utilized machine learning features. This project enhanced my experience in full-stack development, teamwork, and integrating AI-based systems into web applications.

The program also provided training in soft skills, English communication, and professional development, helping me improve collaboration, communication, and job readiness for the technology industry.
